PROFILE

As a software engineer I'm passionate about using my skills and experience in technology to help people by creating innovative and efficient solutions to real-world problems. From a young age, I have been fascinated by tinkering with technology, taking things apart, and figuring out how they work. Through my years of experience in various IT roles, I have built a strong skill set that has enabled me to transition into my current role as a software engineer. I am committed to using my technical knowledge to drive positive change in the world, leveraging my ability to understand complex issues and identify bottlenecks to develop impactful technology solutions that help people in tangible ways. My goal is to use my skills to develop cool things that will have a positive impact on society.

EDUCATION

BrainStation | Diploma, Software Engineering

FEB 2023 - APR 2023, Miami, FL

Broward College | Bachelors in Computer Science

JAN 2016 - 2025, Davie, FL

PROJECTS

Swoosh

MAY 2023,

Developed Swoosh, a pickup game/social media app, I designed and built a web-based platform that empowers users to quickly find local pickup games in real time. With Swoosh, users can filter games by sport, location, and time, rate other players based on their performance, and connect with other players to arrange games.

FullStack Lead Developer

MAY 2023, UKG Industry Project

As a full-stack lead developer for a UKG project, I created a dashboard and chat system using OpenAI to help employees plan their paid time off and achieve personal goals, improving work-life balance. Collaborating with UX designers, I implemented a strategic solution that made a meaningful difference for the company and its workforce.

Lead Backend Developer

MAR 2023, BrainStation Hackathon

Successfully led a team to a closely-won victory as the lead coder in a recent hackathon, showcasing exceptional technical acumen and strong leadership skills in delivering a responsive e-commerce website within the six-hour competition timeframe.
